

Paras Puri

Senior DevOps Engineer | AWS Certified Solutions Architect | Azure | Kubernetes | Terraform | FinOps

parasपुरi0407@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Senior DevOps Engineer with 7 years of experience architecting and scaling cloud infrastructure on AWS and Azure for enterprise clients across Europe and South Korea. Delivered almost 60% cloud cost reduction within 1 month at TruleyAI through targeted FinOps strategies. Engineered and operated 5+ Kubernetes clusters across multi-region deployments and oversaw configuration management of multiple Linux and Windows servers at Nagarro. Skilled in Terraform IaC, CI/CD automation, GitOps-based delivery, autoscaling (HPA, Cluster Autoscaler), DR planning, and ETL pipeline design. AWS Certified Solutions Architect - Associate.

TECHNICAL SKILLS

Cloud Platforms (AWS): EC2, S3, VPC, IAM, Route53, EKS, CloudFront, Lambda, CloudTrail, CloudWatch, ECR, EBS, RDS, SSM, WAF, Secrets Manager

Cloud Platforms (Azure): Virtual Machines, VNet, AKS, Azure Storage, Azure SQL, Azure Monitor, Azure DevOps

Container Orchestration: Kubernetes, Helm, HPA, Cluster Autoscaler, Amazon EKS, Azure AKS, Rancher

Infrastructure as Code: Terraform, Ansible

CI/CD & GitOps: GitLab CI, Jenkins, GitHub Actions, ArgoCD

Monitoring & Observability: Prometheus, Grafana, CloudWatch, Azure Monitor, CloudTrail, SLO/SLA/SLI

Reliability & DR: High Availability Architecture, Disaster Recovery Planning, Multi-region Deployments

Scripting: Python, Shell Scripting, PowerShell

FinOps: Cloud Cost Optimization, Rightsizing, Usage Analysis, Budget Governance

Project Management: JIRA, Confluence, Scrum, Agile

WORK EXPERIENCE

DevOps Engineer - TruleyAI, Taipei, Taiwan

February 2026 – May 2026

- Delivered almost 60% reduction in Azure cloud costs within 1 month by implementing FinOps strategies including rightsizing, reserved instances, and elimination of idle resources.
- Architected and operated Azure-based production infrastructure supporting multiple services across availability zones.
- Adopted GitOps-based deployment workflows with ArgoCD for declarative, version-controlled releases to Kubernetes, improving deployment consistency and rollback control.
- Configured HPA and Cluster Autoscaler policies to handle dynamic workload scaling, improving resource utilization and reducing over-provisioning.
- Established end-to-end observability using Prometheus and Grafana with SLO/SLI dashboards, enabling proactive incident detection.
- Designed and implemented ETL and data pipelines to support analytics and data processing use cases.

Staff Engineer - DevOps and Cloud Infrastructure - Nagarro, Delhi, India

February 2019 – December 2025

Project 1: Enterprise LMS and AWS Integration | Client: Largest industrial manufacturing conglomerate in Europe (German MNC)

Stack: AWS (EC2, S3, RDS, VPC, Route53, EKS, CloudFront, Lambda, CloudTrail, CloudWatch, ECR, SSM, IAM, WAF), Terraform, Ansible, Prometheus, Grafana, Helm, GitLab CI, HPA, Cluster Autoscaler, vSphere, Rancher

- Engineered multi-region AWS infrastructure using Terraform IaC, incorporating Disaster Recovery strategy with cross-region failover and automated backups.
- Deployed and operated 5+ Kubernetes clusters on Amazon EKS with HPA and Cluster Autoscaler, ensuring efficient auto-scaling for variable enterprise workloads.
- Implemented FinOps automation across multi-region deployments to monitor, govern, and reduce cloud spend, maintaining SLA commitments for a 10+ member engineering team.

- Built full observability stack using Prometheus and Grafana, reducing mean time to detection (MTTD) for infrastructure incidents.
- Established GitLab CI pipelines for end-to-end automated build, test, and deployment workflows, accelerating release cadence significantly.
- Automated infrastructure provisioning and configuration using Ansible, cutting environment setup time and ensuring consistency across all regions.

Project 2: Server Configuration Management | Client: Multinational Conglomerate, South Korea

Stack: Ansible, AWX Tower, Docker, Git, Shell Scripting, PowerShell, Linux, Windows Server, JIRA, Confluence

- Oversaw configuration management of 1000+ Linux and Windows servers using Ansible and AWX Tower, ensuring security compliance and zero configuration drift across environments.
- Automated provisioning, patching, and software deployment for physical and virtual instances, supporting a cross-functional team of 10+ engineers.
- Authored PowerShell and Shell scripts for scheduled patching cycles and post-processing of operational reports, improving reporting accuracy and turnaround time.
- Maintained sprint planning, backlog tracking, and documentation in JIRA and Confluence following Agile and Scrum methodology.

CERTIFICATIONS

- [AWS Certified Solutions Architect - Associate](#) | Valid: May 2024 – May 2027

AWARDS AND RECOGNITION

- Nagarro The A Team Award – 2023
- Nagarro The Brightest Mind Award – 2021 and 2020, recognized for outstanding performance and contribution
- Nagarro Cheer Board – April 2021, April 2022, July 2023, December 2023
- HACKATHON 2021 Participant – Nagarro Internal Coding Challenge

EDUCATION

Master of Computer Applications (MCA)

Guru Gobind Singh Indraprastha University, New Delhi | 2016–2019

Bachelor of Computer Applications (BCA)

Guru Gobind Singh Indraprastha University, New Delhi | 2013–2016
